ALWAYS A CLEARVIEW

Choosing new windows and doors can transform your home.

Beautiful windows and doors can transform a home's appearance, but it's vital that windows are more than good looking. They're there to protect you and your home. They need to be energy-efficient, secure and weatherproof. The right windows can make your home a much more comfortable place to live.

We make and install window styles to suit all types of properties. Every single product is precision-made to fit perfectly first time, and then fitted with the minimum of fuss by our skilled teams.

We use multi-chambered Aluminium and PVC-U profiles that are strong, secure, insulating and very low-maintenance. The locks, handles and hinges we use are tested to work time and time again.

There's a full range of woodgrain and coloured finishes available, a wide selection of glazing options and a host of finishing details to create the perfect windows and doors for your home.

Home improvements that make a big difference

Welcome to a very special collection of windows and doors. Whatever the style and age of your property – from a contemporary, modern build to a period home – we have an endless choice of styles and functionality. The only limit is your imagination.

Rooms no longer have to be dark and gloomy to be warm and comfortable. With modern high-performance PVC-U or aluminium frames, your home can be flooded with natural daylight whilst staying cosy and warm. Welcome to the future of windows and doors.

Security and Safety

Security on our products is second to none thanks to innovative features and intelligent design. Our products feature the very latest in high-security hardware, including advanced multipoint locks, keeps and key locking handles. They also feature intelligent design innovations that offer enhanced strength and rigidity so they are less susceptible to forced entry.

The features mean that your windows and doors meet all legal requirements for security as standard. You can also choose to upgrade to Secured by Design-accredited hardware so you know you have products that meet a recognised standard for security products that can deter and reduce crime.

Energy Efficiency

We all want to keep our energy bills as low as we can and reduce our impact on the planet. Your windows and doors will be doing their bit. Clearview windows and doors meet all requirements for thermal efficiency as standard.

If you want products that meet the highest of specifications, you can do that too. When correctly specified, our products are capable of meeting the highest standards for thermal efficiency.

OPTIMA PVC-U DOORS RANGE

PVC-U residential doors are a perennial favourite. They're found in every type of home as front and rear entrances and as pedestrian entrances to garages and outbuildings.

There's one simple reason – they are a brilliant door. They're adaptable, they're insulating. They put up with everything – the weather included – and they can take the best-high security locking systems. They need very little care and attention and just keep looking good, year after year.

With Optima PVC-U doors, every one of those features is that bit better; they're stronger, more energy efficient, more resistant to the elements, more secure and even more attractive. The doors are available in a vast range of styles, glazed, half-glazed and unglazed. They can be combined with fixed lights at the side to create a brighter hallway. They can be colourful, bold and cheerful, or subtle with the simplest infill panel and a muted shade.

OPTIMA PVC-U

Chamfered & Sculptured Single Doors

Optima PVC-U residential doors are the perfect finishing touch to any home improvement project. Safe, secure and perfectly suited to match your windows.

Optima doors are practical, very attractive and versatile enough to be used as front or rear entrance doors.

Although they are lightweight, they are robust and very durable - ideal qualities for a busy entrance hallway or for a family home.

Optima is easy to maintain. No painting, no wood-preservatives, and no worries about them swelling or sticking in wet weather.

There is a vast choice of designs to suit every taste. Using the same systems as our windows ensures a perfect match throughout your home and, because they're designed for security and thermal performance, your home will be warmer and safer than ever before.

OPTIMA PVC-U

Chamfered & Sculptured French Doors

French doors are wonderfully versatile, bringing a touch of class to any room. They make a great addition to a conservatory and work really well in porches, garden rooms and summer houses.

The simple symmetry of the layout is, of course, part of the charm, but those two opening panes give you lots of options. When closed, they're a great way to add light to a dull room or to let you enjoy more of your garden all year round. You can open one or both leaves depending on the weather or direction of the breeze.

Optima French doors can be configured to open outwards or inwards to suit your space, but that's only the start of the tailoring process. You can dress French

doors up with Astragal bars or feature glazing. You can choose the classic Georgian multi-paned appearance or go for pared-back simplicity. Whatever you choose, you'll get incredible standards of finish, thermal performance, security and durability, alongside the benefit of our trademark slim and graceful sections.

STELLAR ALUMINIUM DOORS RANGE

Doors need to be tough. Doors need to be secure. Doors need to be safe. With Stellar, doors can be strong, resilient, safe and practical without being chunky, without compromising aesthetics and without restricting the daylight in your home.

Effortless Style

Stellar doors have the slimmest sections on the market, meaning there's more glass, more light and true flush styling. Stellar is an adaptable system that's redefining glazing but in a way that allows you to be an individual. Your colours, your finishes and layouts that suit the way you live.

Outstanding Performance

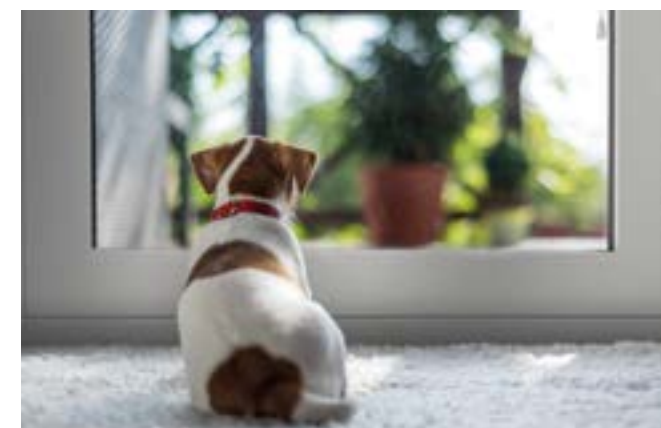

Stellar doors have clean lines and refined elegance, but they're high performers too, insulating your home from the cold outside and from external noise. They're built to be secure and reliable with advanced locking systems and finishes that are tough enough to withstand years and years of daily traffic.

Robust Protection

Stellar's internally glazed frames enhance security, backed by advanced hardware, locks and hinges. Even in exposed locations, it protects your home from the elements and a range of door thresholds keep you weatherproof, allowing easy access for those with impaired mobility.

Perfect Harmony

Stellar is form and function in perfect harmony. Its aluminium profiles allow us to make slimmer frames. We can have clean crisp lines and simplified shapes. It allows us to have weather protection without the chunky overlap of most timber or PVC-U doors.

STELLAR ALUMINIUM Single Doors & French Doors

These are doors engineered for strength and security. Fully compliant with PAS 24 and Building Regulations, they'll also make sure your home is protected from the elements.

Residential Doors

Equally suitable for a front or rear entrance, Stellar's residential doors are a refreshing alternative to timber, PVC-U or composite door designs. They use our super strong aluminium frames, with the same simple lines as our flush windows. Beyond that, the choice is yours – a precision-built bespoke door that will enhance your home and protect it for years.

French Doors

The French door, with its symmetrical layout, has always been popular, but with the slimmest aluminium frames, it's better than ever. It's strong, of course, durable and resilient as high-quality French doors need to be, but the frame never dominates. It's the view you enjoy and the extra light that floods into your home.

STELLAR ALUMINIUM Slimline Bifold Doors

The attraction of a door that simply folds out of the way is undeniable. It's extra freedom in the way you use your home.

It's a boon when you're entertaining, and wonderful on a balmy summer evening. But a bifold that isn't well built can spell trouble. The forces and the weight are considerable which is why Stellar is ideal.

Stellar has all the strength a bifold needs and packs a real punch with its ultra-slim sashes. Innovative thermal break technology means Stellar is also highly insulating and meets all legal requirements for thermal efficiency as standard. As an added plus, the tough polyester powder coating resists damage from scuffs and day-to-day knocks.

Stellar can be configured to your exact needs and is a fabulous example of great engineering. Its components include double hinge fixings for reliable long-term performance, multipoint locking to the main door and shootbolts for high security. There's also an outstanding track and roller system that's easy to operate and maintain, ensuring Stellar is always reliable and always ready to impress.

STELLAR ALUMINIUM Lift & Slide Doors

A well-designed sliding patio door can be a thing of beauty. The proportions are just right, and the frame doesn't dominate.

The panes glide smoothly along their tracks, but when closed, the doors are reassuringly secure. The wind can howl but there's no trace of a draught and you can stand indoors on a frosty morning without feeling the chill. That's what happens with Stellar. The streamlined style hides engineering that makes these sliding doors safe, easy to open and easy to secure. It's packed with technology that insulates your home and its weatherseals are effective and long-lasting.

Why Lift & Slide?

When you're choosing to have feature glazing – that gorgeous wall of glass – your view will be interrupted by the vertical frame that marks the edge of each pane. If you reduce the number of panes, your view is better. One of the benefits of a

sliding door is that each pane can be larger than on a bifolding door. It's simply a matter of weight, and glass can be surprisingly heavy.

Hardware is a crucial part of any sliding door and the Stellar Lift & Slide Door boasts some of the very best with four locking points on the gearing.

'Lift' simply means that there's a built-in system designed to take some of the weight when you're opening the panes. It makes them glide more freely along their tracks. Stellar has very slim frames anyway but they excel in a lift and slide design. With its incredibly slim profiles and interlock options as low as 50mm, it makes the most of the glass area, delivering the coveted light and airy feel with clean aesthetics.

STELLAR ALUMINIUM Thresholds & Cills

Stellar offers a range of thresholds and cills to perfectly complement your doors and windows.

The range includes various options for thresholds which balance easy access with features designed to prevent leaks and draughts. Either open-in or open-out, full-frame or low threshold and a Part M compliant option. With the generous proportions of its timber-style cills, Stellar can enhance almost any architecture. It's even suitable for conservation areas.

OPTIMA PVC-U WINDOW RANGE

Welcome to a very special collection of windows. Optima is a range of chamfered and sculptured windows that balances, beautifully, your needs and aspirations. It delivers a safe, warm and weatherproof home alongside superb style.

This is no ordinary glazing system. It's revolutionary. Its designers went back to the drawing board to create the best possible solutions. Huge investment has gone into the development and manufacture. Every tiny detail has been perfected, and the precision and quality are second to none. Optima is, simply, a world-class product made in the UK to quite exceptional standards.

Flawless Elegance

With Optima, every component works together for flawless elegance and it performs like a dream. It's slim, but it's strong, highly secure and durable. And it looks just as good in a newbuild home as it does in period properties. Colourful if you want it to be or understated if you don't. Wherever you live, Optima fits perfectly.

Energy Efficiency

Optima windows are energy efficient with a host of features to protect your home from the elements. The result: a window that is better insulated, better sealed, stronger, more secure and more durable. This is an exceptional range with the highest possible standards.

Uniquely Versatile

Optima is both unique and adaptable and suits every style of home. It's a versatile window that can be made to almost any size or layout. Every window frame remains a one-off, made to your order, and with Optima there are options to suit everyone.

Trusted and Proven

Choose Optima and you're choosing a trusted brand that's been transforming homes for nearly 50 years. A brand with a well-earned reputation for high quality windows and a brand that is at the forefront of innovation. It means you can be confident you are making the right choice for your home.

OPTIMA PVC-U

Chamfered Casement Windows

The slim, chamfered shape of the Optima Chamfered casement window is perfect for replacing timber or aluminium frames or upgrading from early-generation PVC-U.

Perhaps the most familiar style of window in the UK, casements are characterised by outward opening sashes, combined with fixed panes (lights). The opening panes can be hinged at the top or at the side, and the overall layout of the window can vary from very simple to quite elaborate.

With a casement, there really is a vast choice. You don't have to replicate your existing window layout - unless you want to. If you've always wanted a larger opening pane - go for it. If you've never been able to reach the handle on a kitchen or bathroom window, we'll sort a layout that helps.

We can add details to complement your architecture, glaze the windows to suit your insulation needs, even offer you a different coloured finish for indoors and out. It's about creating a window that works perfectly and which looks fantastic in your home.

Optima's classic, chamfered shape looks at home in any style of property. Its sections are elegant and graceful, not chunky. They let more light in and don't impede your view.

OPTIMA PVC-U

Sculptured Casement Windows

Because properties and tastes differ, Optima casements are also available in a distinctive sculptured profile design that works perfectly in every home.

The elegant Optima Sculptured Casement Window has a gently curved shape which looks as good in a new build home as it does in older properties. It's a versatile window that can be manufactured to almost any size or layout you require, including bay and bow windows.

Like our chamfered windows, Optima sculptured casement windows are made from the Optima range of profiles which have been engineered to give long-lasting style and performance. Optima profiles are slim, but strong and insulating. When

combined with our high-quality glazing, they create a thermally efficient window that is robust and very easy to maintain.

You can choose your new windows in classic white, or in a range of beautiful wood effect finishes and stunning colours. If you want to, you can even choose different finishes for the inside and outside of your home.

Optima is unique. No other windows are produced in quite the same way and no others have the same great features.

PVC-U

Flush Casement Windows

The Flush Casement window design is elegant in its simplicity and is found in all sorts of traditional properties, from all periods.

What's more, the lines are understated which makes them ideal for more contemporary properties which rely on minimalist styling. A flush casement is simply one where the opening window sits flush in its frame, rather than standing proud.

Flush Casement windows replicate the timber original's appearance to perfection,

but go well beyond in terms of thermal performance and weathering capability.

Now it's possible to have the look you want and the comfort you need, combine charm with security, character and ease of maintenance. It's old style with new standards.

PVC-U Colour Options

Your property is unique, and with Optima's wide range of finishes you can choose to stand out or blend in. It's your home, your style, your colours.

Available with white PVC-U internal faces, or foiled on both sides on a complementary base colour for better looking installations.

PVC-U Hardware Options

Your windows and doors deserve the best hardware. We supply only the top names in hardware products to complement our high standards.

Window Handles

Designed for longevity and durability in beautiful finishes to perfectly complement your windows and doors.

Hinges

Every component of our windows and doors works together for a perfect finish.

Letterplates

Strong and stylish in the same wide range of colours and finishes.

Knockers and Numerals

Your beautiful home should include all the period features and decorative touches that make it special.

STELLAR ALUMINIUM WINDOW RANGE

Aluminium systems have come a long way since their earliest days. Now, Stellar is pushing standards even higher, with insulation and weather protection a fundamental part of the design, not an afterthought.

Five-Star Style

Stellar is an outstanding system, but it doesn't steal the show. It has the slimmest sightlines on the market, allowing your view to take centre stage. The glass area in windows is maximised and your home is filled with light.

Stellar Performance

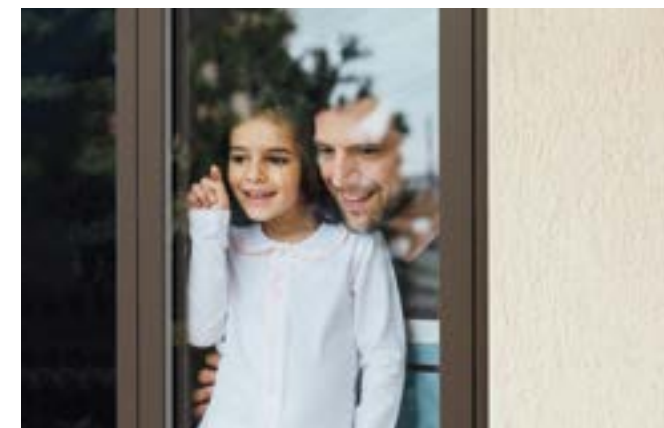

Stellar Aluminium window frames are long-term performers. They're resilient, durable and will last for decades. And if, eventually, the frames need to be replaced, the aluminium can be recycled. Stellar is about strength, style and performance. It's about refusing to compromise.

Impressive Efficiency

Stellar windows use less material than other systems. They save energy in your home and are responsibly produced. Stellar can reach WER Band A++ with triple glazing and meets or exceeds all legal requirements for thermal efficiency, ventilation and security for complete peace of mind.

Reassuringly Secure

Stellar windows are fitted with multipoint locking technology, providing protection all around the frame. Hinges are concealed so they can't be targeted and Stellar accommodates the latest high-security locks from Yale, the trusted home security specialist.

STELLAR ALUMINIUM Flush & Fully Flush Casement Windows

When advanced design meets outstanding materials and a commitment to long-term performance, you know you're looking at a Stellar window.

A Classic Flush Casement Window

With flush lines to the exterior and a neat square shape indoors, our Stellar Flush Casement Windows are simple, elegant and understated. The frames are slim, allowing more light into your home than comparable sized PVC-U or timber frames. Built from robust aluminium sections, they're strong enough to support large panes without the need for reinforcing. The result is pure class. Opening panes can be top or side hung, and you can choose almost any configuration. If symmetry is important, dummy sashes allow us to create equal sightlines for opening and non-opening panes. These windows are designed to work perfectly with high-security hardware, lock systems and hinges for your complete peace of mind. Choose the colours that best suit your home, handles in contrasting or matching colours and every detail will be made to your exact specification.

A Fully Flush Casement Window

The sleek Fully Flush Casement Window offers the most streamlined look on the market with flush styling for both the interior and exterior. No angles, no overlaps, just pure clean shapes and ultra-thin frames that set Stellar apart.

Hardware has been carefully selected. In addition to reliability and durability, every lock, stay, hinge and handle contributes to the high level of security. What's more, all these practical qualities are delivered without compromising Stellar's remarkable lines.

Again, the configuration is up to you. Replicate the pattern of opening and fixed panes in your existing frames and enjoy improved light levels, better insulation and easier maintenance or throw caution to the wind and choose a radical pared-back style. Stellar is adaptable and will cope beautifully whatever your design ambitions.

STELLAR ALUMINIUM

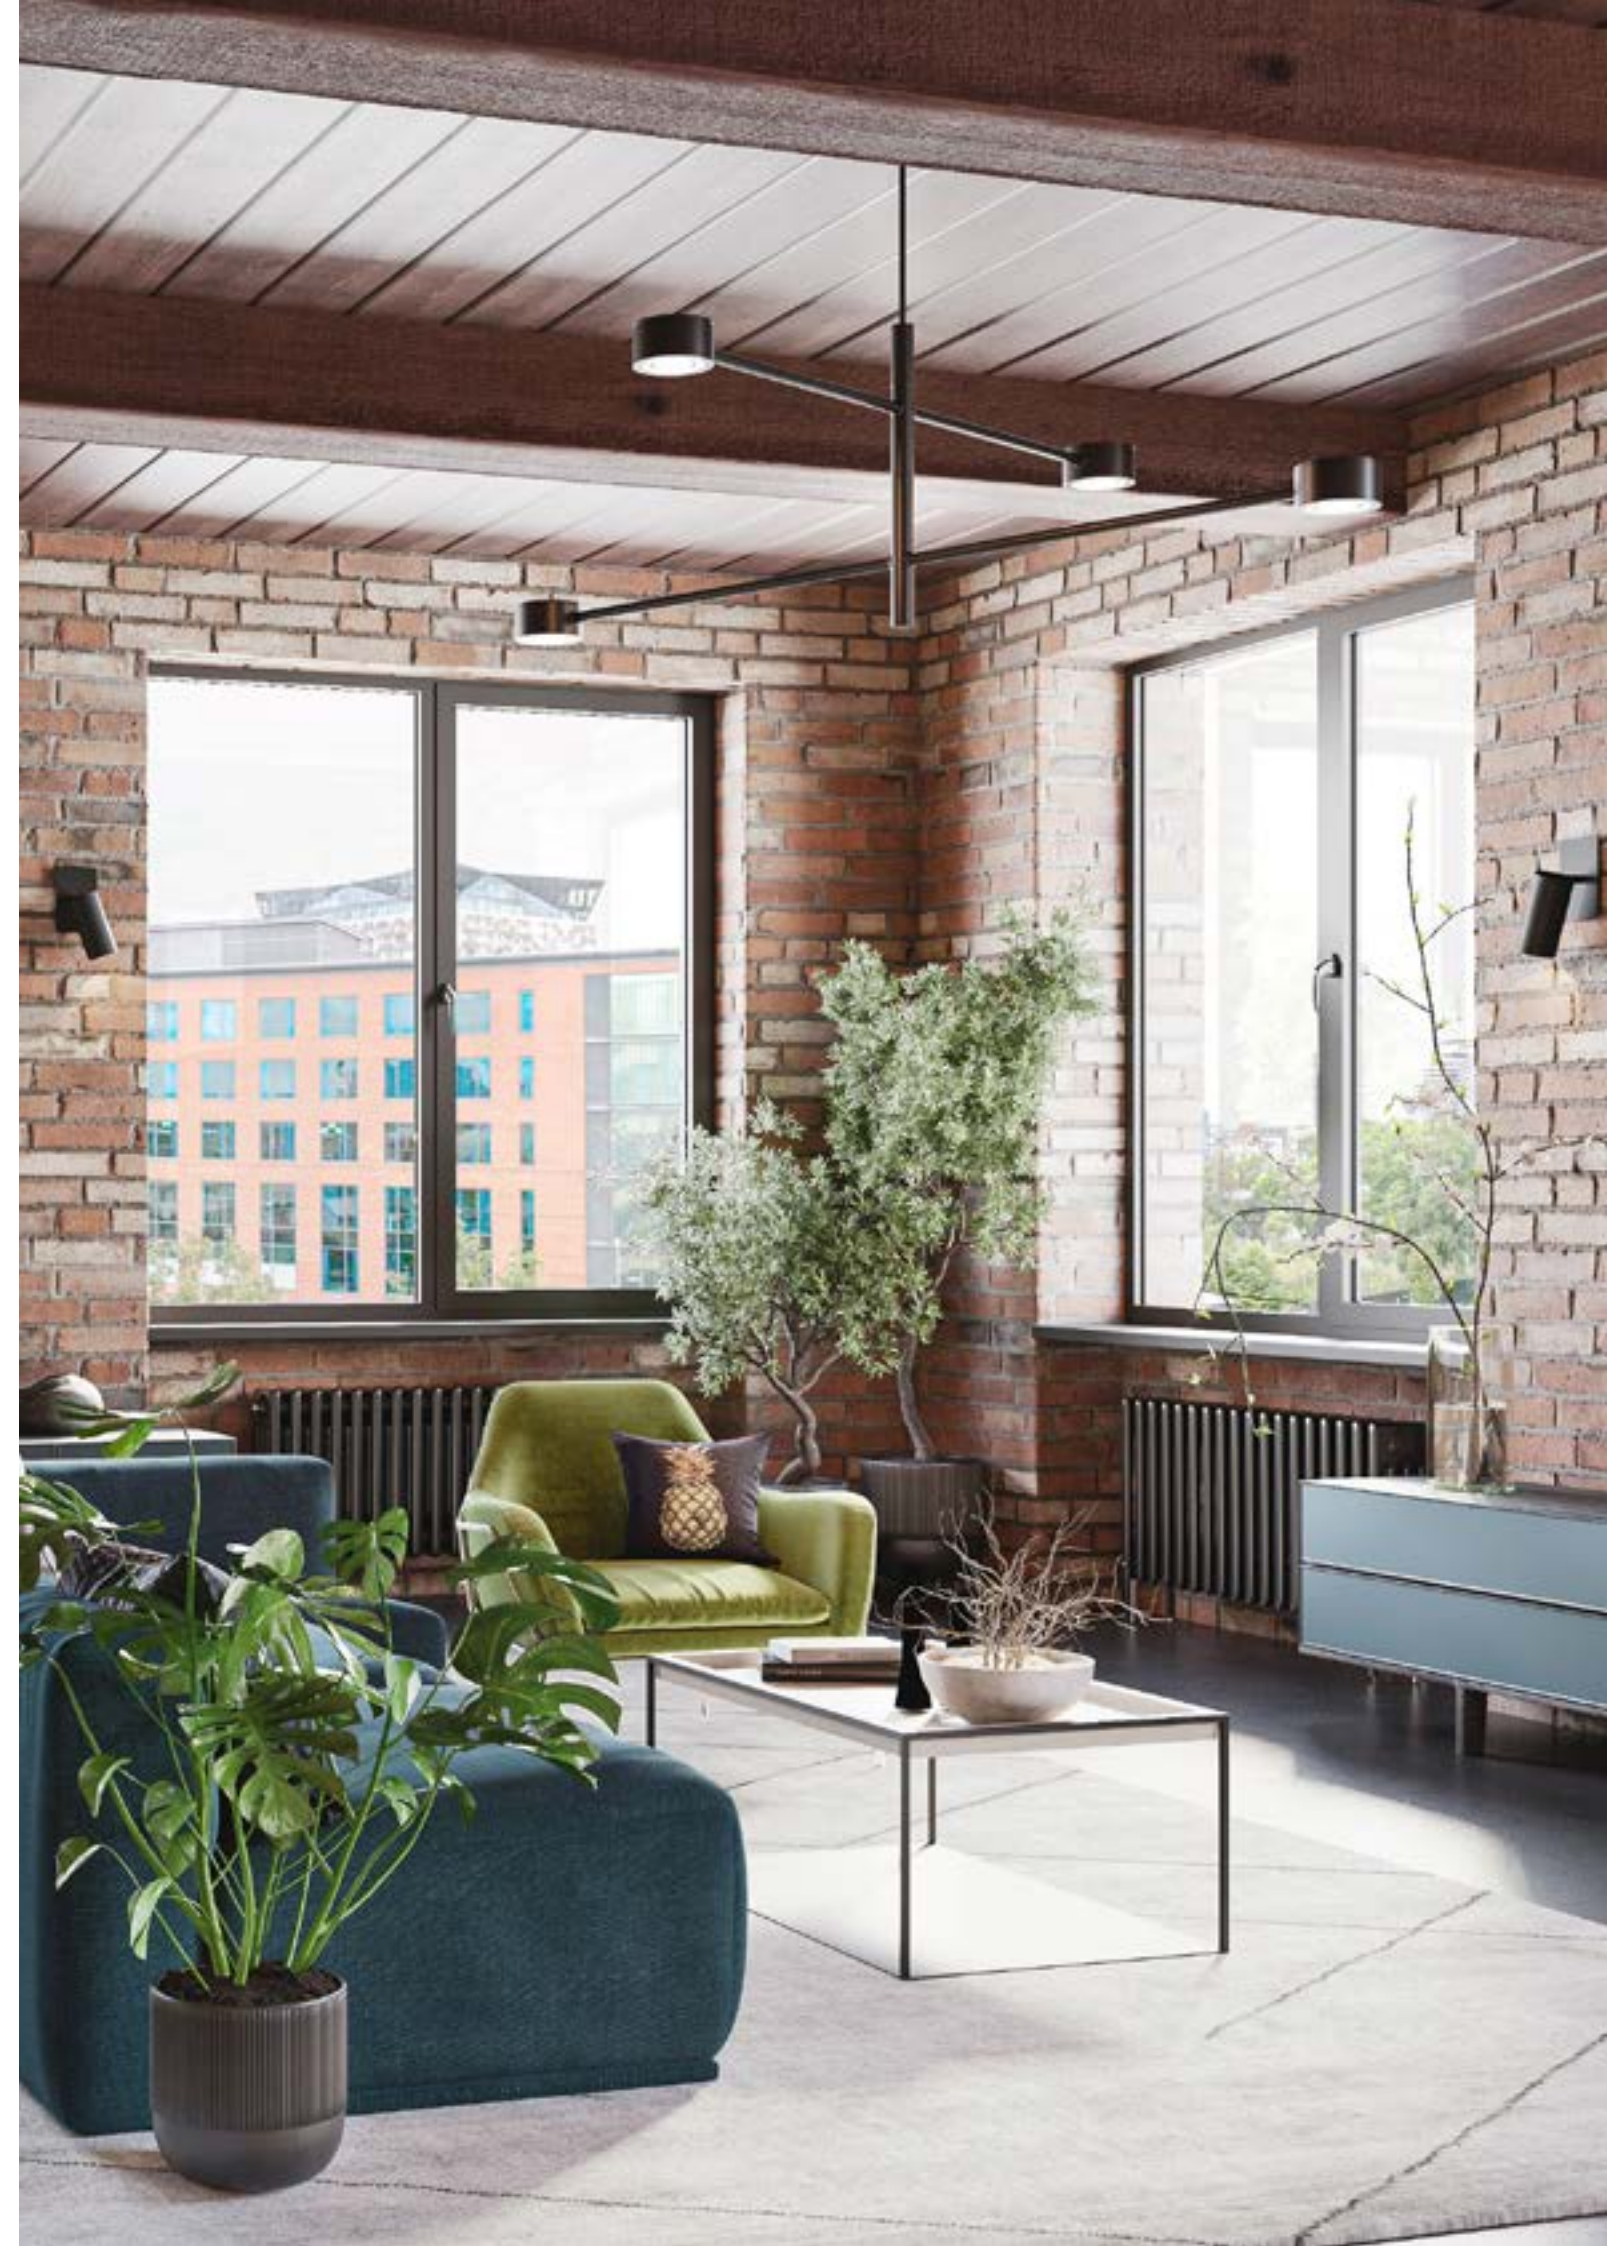

Flush Tilt & Turn Windows

With its contemporary slim sightlines, stunning aesthetics and flush appearance, the Stellar flush tilt & turn window is perfect for residential and commercial projects.

The Flush Tilt & Turn Window has a strikingly slim sash that sits flush against its frame and has elegantly concealed gearing to deliver a beautifully streamlined finish. It gives you a dramatic expanse of glass that maximises light and views to create a sophisticated space that's a joy to live in. But its credentials extend far beyond its looks. The Flush Tilt & Turn Window has all the features you would expect from a

window designed for use in medium and high rise buildings. It offers outstanding thermal and weather performance to protect you from the elements. It has robust internal hardware with multiple locking points for reassuring security. The intelligent gearing prevents selection from tilt to turn and vice versa to enhance safety. Restrictors can be fitted for extra safety where required.

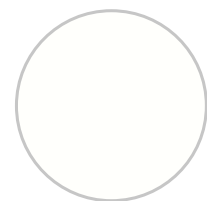

STELLAR ALUMINIUM Colour Options

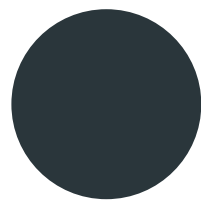

Stellar windows and doors are finished with a tough, durable Qualicoat certified powder coat, which surpasses European requirements.

The finishes need next to no maintenance – just a quick wipe down to remove surface dirt. Stellar offers marine grade finish as standard to ensure outstanding resilience in even the most challenging environments.

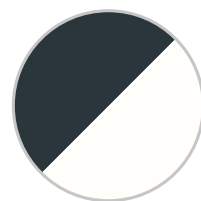

There's a wide choice of stocked colours chosen to enhance all types of building materials and if you want to choose something different, it's possible to have your windows or doors finished in any RAL colour.

EUROCELL ROOFS & SKYPODS RANGE

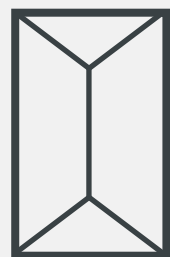

Flood your home with natural light

Imagine creating a stylish new living space that's flooded with natural light. Imagine an inspiring contemporary design feature that will not only enhance your lifestyle but add value to your home too. Some would call it the 'wow' factor. We call it Skypod – an innovative pitched lantern roof range that's been created for today's style-conscious homeowner.

A Skypod to suit you

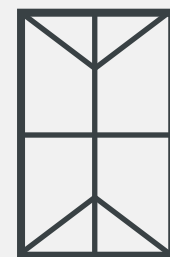

Skypod is available in a wide range of sizes and styles, so you can create a lantern roof that complements the individuality of your home. Skypod is suitable for a wide range of projects such as flat-roofed extensions, orangeries, new builds, kitchen-diners and garage conversions. Go large to create an impressive feature on your flat roof – maximising the natural light in your room.

THE RESIDENCE COLLECTION TIMBER ALTERNATIVE WINDOWS & DOORS

Completing the aesthetics of beautifully built homes across the world, windows and doors have the ability to transform a property's curb appeal, when done right. Modern material doesn't necessarily mean that traditional design has to be compromised, and British Manufacturer The Residence Collection goes some way to prove this.

Conservation Areas & Listed Buildings

The Residence Collection has been specifically designed to aesthetically replicate the documented historical window designs from the 19th Century period and therefore has been approved for use in many Conservation areas & Listed Buildings across the UK.

Design & Colour

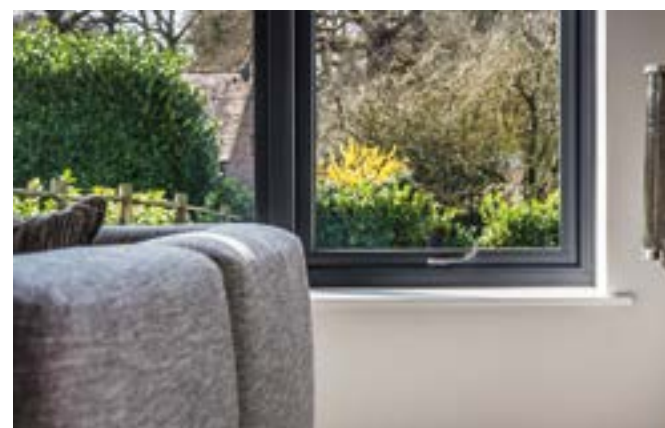

Choose the perfect colour for your home with a diverse palette curated to inspire. Offering an eclectic mix of authentic finishes covering a number of architectural styles, choose from our 6 Colour Collections featuring traditional oaks, to modern favourites such as Painswick and Eclectic Grey.

Thermally Efficient

Offering a suite of thermally and acoustically superior window and door systems, featuring the latest security, maintenance and performance innovations, whilst still appearing traditional. Achieving U-values of 0.8 with triple glazing, and 1.2 as standard with double glazing, far surpassing the British Building Regulation requirements.

Sustainability

As a company we put sustainability at the forefront of our business, our head office is zero-waste to landfill and we're well on our way to making company vehicles electric and achieve our target to be carbon neutral by 2025. Also, all uPVC windows can be fully recycled up to 10 times, and included within The Residence Collection is a 100% recycled material section, as well as contributing to lower energy bills and carbon emissions due to their outstanding thermal performance.

RESIDENCE 9

The true timber alternative

Residence 9 is a window and door system designed to authentically replicate 19th Century timber designs. The traditionally elegant flush exterior and stylish decorative interior create that classic aesthetic.

Features & Benefits

- ★ 100 mm frame with 9 chambers
- ★ Fully foiled rebate
- ★ A traditional collection of 23 colours.
- ★ Dedicated window and door sashes, doors available as open-in, open-out and engineered
- ★ Multiple internal bead options, decorative, square or staff
- ★ 44mm triple glazing achieves up to A++ window energy rating and a U-value of up to 0.74 W/m²K
- ★ 28 mm double glazing achieves up to an A window energy rating and 1.2 W/m²K U-value

Beauty & Character

The beauty and character of timber, but without the maintenance! The epitome of high-end performance windows.

Your Residence 9 windows, doors and orangeries are not only stylish, they will withstand the test of time too. They include state of the art design features and champion British craftsmanship using time honoured traditions and modern manufacturing processes. With a range of splendid styles and configurations, Residence 9 allows you to create an individual design statement for your home.

Traditional Cill Detail

The Radlington Cill is the modern interpretation of a timber cill, designed to authentically accompany your Residence 9 windows and doors.

Authentic Butt Hinges

Butt Hinges can assist in retaining the original timber window aesthetic.

Georgian Bar

With the Residence 9. Georgian Bar you can recreate the pattern of the original windows to preserve your home's character or add new personality.

Weatherbar

Old timber windows often had a raised moulding that ran horizontally or vertically, this bar looked distinctive and gave the windows depth and character. The bar's purpose was to shed dripping water and to increase the strength of the mullion, that's why we recreated this optional feature with Residence 9, time served traditional performance and aesthetics

Bays & Couplers

Contemporary and traditional bay windows and orangeries can be sympathetically recreated using Residence 9's stunning fluted corner-posts and defined plinth

RESIDENCE 7

Beautifully flush inside and out

Residence 7 windows and doors are characterised by elegant clean lines. A flush aesthetic that is modern and versatile with superior acoustic and thermal properties. The ideal solutions from modern new builds and city apartments to country cottages, period houses and everything in between.

Features & Benefits

- ★ A bespoke palette of 21 standard foils plus 3 standard unfoiled matt colours
- ★ 44mm triple glazing achieves up to A++ window energy rating and 0.84 W/m²K U-value
- ★ 28mm double glazing achieves up to an A window energy rating and 1.23 W/m²K U-value
- ★ 75mm frame with 7 chambers
- ★ Dedicated window and door sashes, doors are available as open-in, open-out and engineered
- ★ Fully flush internally & externally
- ★ Multiple internal bead options: decorative, square or staff

Hardware

The Regal Hardware range combines the traditional style and enduring elegance of 19th century ironmongery with the quality and durability you'd expect from today's manufacturing techniques.

Whether you want to retain original character in a period property or inject some unique style and individuality into a modern home, our handles and stays will enhance both standard 70mm profile and flush sash replacement windows. Choose from monkey tail or pear drop designs.

From traditional black wrought iron effect to gleaming polished chrome, Regal Hardware comes in a choice of 9 different colours to help you express your individuality and put the finishing touches to your windows.

RESIDENCE 7

Colour Options

Residence 7 windows and doors are finished to perfection, combining a modern flush appearance with all your personalised choices why not head to the website to find your nearest installer and let your dream home become a reality.

RESIDENCE 9

Colour Options

Residence 9 has a range of colours and shades to suit different architectural periods and individual choices. 17th Century windows were oak and left unpainted, whilst 19th Century windows were always painted. The inspirational dual colours can transform your home room by room, creating your perfect solution, this is your Residence 9.

FIRE DOOR RANGE

Fully compliant FD30 composite fire door system for Housing Association, Property Management and Trade

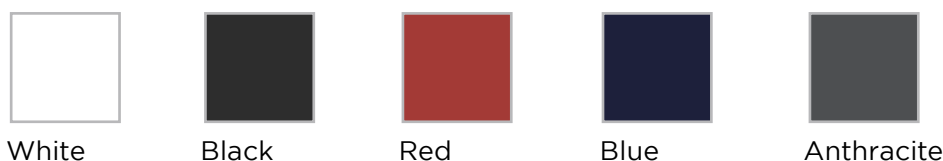

Why choose our fire doors; Proven fire resistance, consistency in testing, Q-Mark, Certification, variety of options and super easy to fit.

Features & Benefits

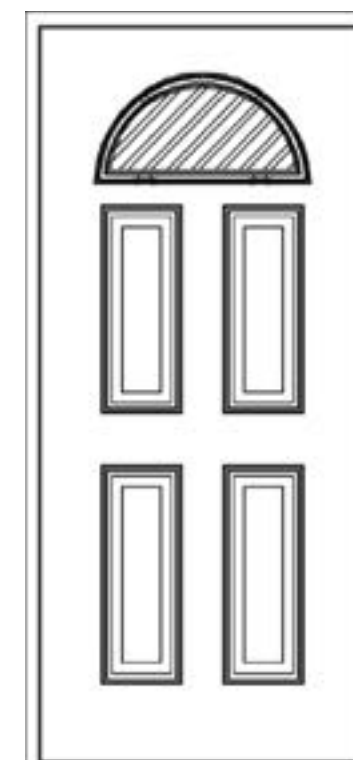

- ★ This FD30 door set manufacture is third-party certified to the BM Trada Q-Mark Fire Door Manufacturer certification scheme.
- ★ The FD30 GRP composite fire door system not only demonstrates integrity against fire, but also delivers performance relative to smoke control, security, weather, sound insulation and thermal performance.
- ★ Tested to EN1634-1: 2014.
- ★ Proven fire resistance – achieving an average of 45 minutes integrity (rated to a minimum fire resistance of 30 minutes).
- ★ The FD30 door blank meets the requirements of the Q-Mark Door Blank scheme to STD 047. The fire entrance door range is stocked and distributed under Q-Mark STD 171.
- ★ Fitted with Winkhaus UK, FireFrame®.

SCREENLINE BLINDS

Integral blinds in glass are a neat and stylish alternative to curtains, external blinds and other window dressings for your home or business. Choose from Venetian or pleated blinds which fit perfectly inside the double-glazed unit, and means they won't get damaged and will never need cleaning.

Screenline blinds are the only viable option for light control in bi-folding and sliding doors.

SL20-22C VENETIAN C System

ScreenLine SL20-22C is a patented magnetic system with manual operation (raising and tilting function) for venetian blinds incorporated within 20-mm or 22-mm insulating glass units.

Features & Benefits

- ★ Suitable for all vertical window applications
- ★ Ideal solution for conservatory shading
- ★ Total privacy and light control for folding sliding doors
- ★ Gives excellent utilisation of partitioned office space
- ★ Suitable for retro installation into existing frames
- ★ Available with and without cord

C System in detail

The external magnetic device applied on the glass by means of high-resistance adhesive tape contains a cord loop and a magnet that is perfectly interfaced with the magnetic joint of the internal drive, which is completely housed inside the head rail. The movement provided to the cord enables the rotation of the magnets that activate the blind.

The cord is kept under tension by means of a special cord tensioner applied on the glass.

SL20-22C is particularly suited to structural façades, although there are actually no limits to its application.

The integrated unit can be fitted into the window frame like standard insulating glass.

The system is supplied with warm edge spacer bars as standard.

Available Colours

		
S102	S130	S155
		
S106	S142	S156
		
S125	S149	S157

SCREENLINE SL20-22W W System Solar Battery

ScreenLine SL20-22W is a battery-operated motorised system with raising and tilting function for venetian blinds incorporated within 20-mm or 22-mm insulating units.

Features & Benefits

- ★ Streamlined installation procedure
- ★ No need for electrician to install
- ★ Energy saving
- ★ For 20, 22 and 27mm cavity, in Venetian and pleated versions
- ★ Touch control keys
- ★ Batteries can be easily replaced
- ★ Radio remote control supplied as standard
- ★ Batteries recharged by means of a micro-USB connector

W System in detail

The blind is raised or lowered either via a touch control device that is magnetically attached to the window or by remote control (option).

The system can be fitted quickly and easily and is applicable to many types of window frames, even existing ones; no wires or electrical contacts are required and internal glass thickness is irrelevant.

ScreenLine® SL20-22W is halfway between a manual system and a traditional motorised system.

It is suited for every environment: homes, offices, public buildings, etc., as it needs no maintenance. It ensures with time the insulating properties of the insulating glass unit, notably protection from dirt or weather conditions. Furthermore, when supplied with a solar panel, it is also beneficial in terms of energy saving.

The system is supplied with warm edge spacer bars as standard.

Available Colours

SCREENLINE SL20-22S S System Venetian 2.0

ScreenLine SL20-22S Venetian 2.0 is a manually-operated patented magnetic system with raising and tilting function for venetian blinds encapsulated within 20 and 22-mm cavity double glazing units.

Features & Benefits

- ★ Great for conservatories
- ★ Highly modular system - possible to install two blinds within the same unit.
- ★ Extremely versatile within simplicity of control
- ★ An easy and lasting solution for roof window shading
- ★ Light transfer down the blind edge eliminated by using special 'L' shaped-size guides.
- ★ Can be adjusted to any position and in every direction

S System in detail

SL20-22S Venetian 2.0 is operated by a magnetic slider, placed on the right or left-hand edge of the glass. A narrow adhesive transparent profile ensures the linear movement of the slider. The blind is raised and lowered by moving the slider up or down and tilted by slightly lifting or lowering the same slider.

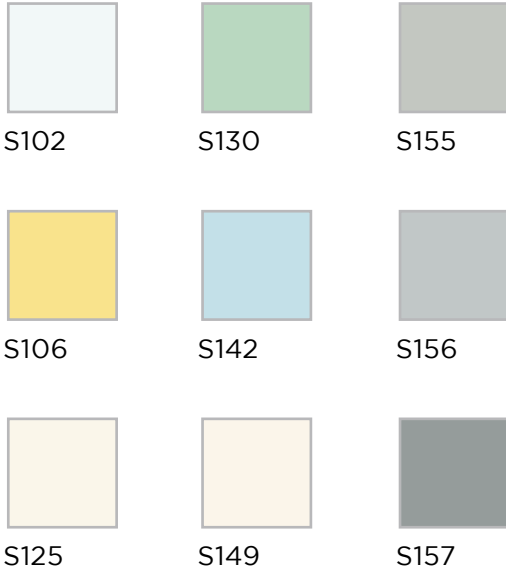

SL20-22S Venetian 2.0 is suited to all types of window frames.

It ensures with time the insulating properties of the double glazing unit, notably protection from dirt or weather conditions. The integrated unit can be fitted into the window frame like standard IGUS.

The system is supplied with warm edge spacer bar as standard.

The magnetic slider is treated with a Sanitized®* patented finish, which provides a long-lasting antimicrobial protection function.

Available Colours

GLASS & GLAZING

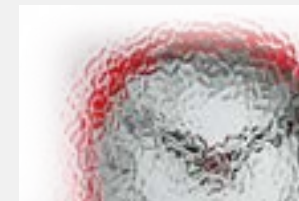

Single, toughened, double glazed and triple glazed units, table top glass, mirrors and splash backs.

If your current glazing is starting to look a bit worse for wear, has become misted, damaged or is ultimately failing, we can manufacture replacement made to measure glass & glazing in our state-of-the-art production facility.

PILKINGTON Obscure Textured Glass

No one offers a bigger choice of original designs for patterned/textured glass, in fact, you can choose from a range of 21 designs from traditional to contemporary.
